

Normal 2FA WEB based access

After successful enrollment into DUO each time you access a 2FA protected WEB system, you are presented the below authentication options:

The screenshot shows a web-based authentication interface for the Leiden Institute of Physics (LION). On the left, there is a logo and several links: "What is this?", "Add a new device", "My Settings & Devices", and "Need help?". The main area is titled "Choose an authentication method". It offers two options: "Duo Push RECOMMENDED" with a green button labeled "Send Me a Push", and "Passcode" with a green button labeled "Enter a Passcode".

The easiest mechanism is the push mechanism where you only have to hit the approve button in the DUO app on your smart phone to login. The passcode can be obtained by clicking the created LION entry in the DUO app. It will show a six digit code that you can enter in above window, second option.
