

Scanning with HL511a scanner

The Windows PC in room Huygens 511a has a flatbed scanner attached. It can be used to scan document to a file, e.g. a PDF file.

- Login to the Windows environment using your STERREWACHT username and password.
- Put the original onto the flatbed scanner
- Press the PDF button on the scanner
- After scanning you will be presented the scanned PDF document in Adobe Acrobat Reader. From that program just use the Save as option to store the PDF document on your Z: drive (Unix Home directory)
